

STATE OF WASHINGTON
DEPARTMENT OF NATURAL RESOURCES
DOUG SUTHERLAND
Commissioner of Public Lands
Olympia, Washington 98504

Application for Permit to Utilize Open Water Disposal Site

Application for use of an established site must be for dredged material that meets the approval of federal and state agencies and for which there is no practical alternative upland disposal site or beneficial use, such as beach enhancement. **Please be sure to answer questions on the back of this form.**

1. Name of company or person desired on permit_____
2. Description _____ (e.g., municipal corporation, Washington state corporation, single individual, etc...)
3. Address_____
4. Business phone_____ FAX_____
5. Name of agent or contact person_____
6. a. US Army Corps of Engineers Permit Number_____
- b. Shoreline Substantial Development Permit Number_____
7. Uniform Business Identifier (UBI)_____
8. Volume of material to be disposed_____cubic yards
9. Has material been analyzed for levels and type of contamination and biological effects?_____
10. Name of Open Water Disposal Site_____
11. Proposed site use dates_____
12. Origin of material to be disposed (site name, Latitude/Longitude)_____
13. See reverse side for Permit Fee Schedule
14. Applicant agrees to furnish a copy of the following documents before this permit is executed: US Army Corps of Engineers permit, Dept. of Ecology Water Quality Certification, Dept. of Fisheries Hydraulic Project Approval, National Marine Fisheries Service Endangered Species Act concurrence letter.

I HEREBY CERTIFY THAT I have prepared this application, and to the best of my knowledge, the information provided is an accurate and true representation of the facts. Applicant/permittee agrees to defend and hold the department and the state of Washington harmless from any and all claims suffered or alleged to be suffered on the site or arising out of misstatements or operations by the applicant. I further attest that I have the authority to submit this application and to agree with conditions of the permit. I understand that all material must be from in-water sources, unless otherwise approved by the department, and that no material can be placed on the site until a permit is issued by the Department of Natural Resources. Authorizing by the department for use of the site is contingent on the contractor, including the tugboat operator, accurately placing material within site target area, removing any debris with upland disposal, and following any other conditions imposed in the permit.

Dated at _____, Washington, this _____ day of _____ 20____.

PERMIT FEE SCHEDULE

All disposal sites in Puget Sound and Straits of Juan De Fuca:

Forty-five cents (45¢) per cubic yard. Minimum non-refundable fee is \$2,000.00. The non-refundable fee must be submitted prior to execution of the final disposal permit.

Grays Harbor/Willapa Bay Sites:

Ten cents (10¢) per cubic yard. Minimum non-refundable fee is \$300.00. The non-refundable fee must be submitted prior to execution of the final disposal permit.

Other Fees and Charges:

Penalty fee for any material disposed outside the disposal zone, in excess of authorized volume, or in any way not in compliance with the Site Use Authorization granted as a result of this application is five dollars (\$5.00) per cubic yard.

In order to identify upland or alternative water disposal sites, the following questions must be answered in writing at the time of application:

- 1. Are there any upland or in-water disposal sites within ten (10) miles of your proposed operations where the dredged material can be beneficially used for:
 - a. Improving a recreational beach for swimming or clamming? YES / NO
 - b. Cap containment material? YES / NO
 - c. Any other beneficial use? YES / NO

Explain: _____

- 2. If so, please provide a map of the location that indicates volume to be used at the site.

- 3. Of the sites identified in No. 1 above, what constraints exist that prevent you from using those sites based on social, economic, and environmental concerns?

- 4. Have you been directed to dispose of any of the project dredged-materials on an upland site because of environmental concerns?

- 5. Based on the presence of pollution sources such as storm drains, boat repair yards, marinas, and outfalls, do you think any of these dredged materials may be required to be placed in a confined site because of environmental concerns?
